

Pre-Treatment

Pre-treating dark t-shirts is now easy,
fast and cost effective
with the Polyprint Pre-treaters

Polyprint Pre-Treater I

The Polyprint Pre-Treaters are equipped with 4 spraying nozzles, which are individually controlled and allow defining the spraying width in 4 zones.

The spraying length is easily defined step less using a slider and the amount of liquid can be adjusted electronically.

The ultimate solutions for pre-treating dark fabrics for direct printing using white ink.

- **Uniform spraying for optimal white ink printing**
High quality spraying nozzles provide uniform spraying

- **Consistency - Repeatability**
All t-shirts of the same batch are coated the same way and the prints are identical.

- **Cost savings on the pre-treatment liquid**
The quantity of pre-treatment liquid is electronically controlled and can be easily adjusted

- **Easy to use and to clean**
A built-in drip tray allows nozzle cleaning with the press of a button
The spraying nozzles can be removed without tools for intensive cleaning using the ultrasonic cleaner provided.

- **Keeps the room clean**
Closed chamber during spraying (Pre-Treater II)

Polyprint Pre-Treater II

Technical data	Pre-Treater I	Pre-Treater II
Spray area	38 x 48cm	42 x 60cm
Spray method	During table movement outwards	Nozzles move over the table when inside
Machine Dimensions	86 x 77 x 44cm	90 x 73 x 55 cm
Machine weight	60kg	75kg
Drawer hanging length	60cm	80cm
Packaging dimensions	90 x 80 x 57cm, 78kg	95 x 75 x 95cm, 80kg
Spray nozzles	4	
Nozzle pressure	4,0 bar	
Voltage	230V AC	
Rated power	400W	
Power consumption	2A	
Main fuse	12A	
Included components	2 spare nozzles, ultrasonic cleaner device.
